

Beyond (spectacle) Episode I

Performance **Annie Abrahams & Igor Stromajer**,

Friday 19 October 2012 – 19h30 Paris time

Here are two links :

<http://android.mosaika.tv/> This gives, when we are not streaming really ugly sound and images, but as soon as we will be streaming all will be perfect. Here you can see Igor and me. The same image (but without anything around) will be projected in front of the public in Paris.

<http://bram.org/beyond> is the url for the chat command room. We try it out now, normally everything will be cleaned for the beginning of the performance. One can navigate between commanding, guiding, teasing? Igor and me. The public in Paris will also get this url as well as the public who will be following us online via the streaming of ShowOff <http://showoffparis.fr/performances/> So commands will be in English and in French.

At either side of the projection there will be a “reader” with a computer. One will read aloud in front of a microphone all Annie commands, the other all Igor commands.

All the text will be read and the performance will probably be more about the text being written collectively than about what Igor and I can make out of it.

19h15 Igor and Annie connect to check sound etc (I hope I can make it – if not Igor will wait for me)

19h25 I will leave the interface and go in front of the public in Paris.

19h30 I will very shortly introduce the performance to the public and give them the command url.

As soon as I will have finished I will come back in front of the webcam, we will wait 30 seconds (so Igor and I will be in the right position and the technician can start the video projection).

I

20h End The sign for the END will be given by Jan, He will command **three time STOP**. That is the sign for the technician in Paris to stop the projection. Igor and I will have to continue 1 minute after seeing the END sign in order to give the technician time to stop projecting.
